Annual Financial Statements for the year ended 31 March 2020

Accounting Policies

1. Presentation of Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations and directives issued by the Accounting Standards Board (ASB), unless otherwise indicated, and in accordance with Section 91(1) of the Public Finance Management Act (Act No. 1 of 1999).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand ("R") which is also the functional currency of the Property Management Trading Entity ("PMTE"). Values are rounded to the nearest thousand ("R'000") unless otherwise indicated.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

1.1 Significant judgement and sources of estimation uncertainty

1.1.1 Control of immovable assets

The Minister of Public Works and Infrastructure is the legal custodian of all immovable assets vested in national government, except in cases where custodial functions were assigned to other ministers by virtue of legislation before the commencement of GIAMA on 1 April 2009. The Department of Public Works (DPWI) assigned those functions to the PMTE and by virtue of the transfer of functions that occurred on 18 November 2013, and 30 March 2015, the PMTE controls those assets for accounting purposes. The PMTE benefits from the assets in pursuit of its objectives and regulates the access of others to the benefits of the assets (i.e. the PMTE decides who may benefit from the use of the assets). Control includes the ability to acquire, dispose and maintain the assets.

PMTE monitors state land reflected on the Deeds Register on an on-going basis. Land registered in the name of the national government, that could not be confirmed to be under the custodianship of other national custodians, is recognised by the PMTE. Any changes in ownership is derecognised accordingly. PMTE discloses a contingent asset for properties identified to be under its custodianship where the property could not be reliably measured due to the extent not being determined through the Office of the Surveyor General.

In terms of paragraph 7.37 of the vesting guidelines issued by Department of Rural Development and Land Reform on 30 March 2017, "for any provincial government to claim ownership of vacant land such province should provide proof of intended use. The absence of such proof automatically means that such land vests in the National Government of RSA". PMTE is thus deemed to have control over such land parcels and has currently recognised unvested land parcels.

PMTE recognises immovable assets where the property will vest with the national government based on the principles contained in the approved vesting guidelines.

Whilst properties (land and buildings) as outlined in the Endowment Act no. 33 of 1922 are disclosed in the financial statements of Department of Defence (DoD), there are a number of extended structures pertaining to such endowment facilities that have "encroached" onto neighbouring land under the custodianship of PMTE. Whilst such structures are reflected as part of endowment properties by DoD, the underlying land is currently reflected in immovable assets by PMTE until such time as it may be transferred to DoD. Control and or access over such land may be restricted given the DoD facilities thereon.

1.1.2 Assets and liabilities related to the transfer of functions

For initial measurement purposes, assets acquired through the transfer of functions are measured at their carrying amounts as per the records of the DPWI. Where those carrying amounts do not represent GRAP compliant amounts, the carrying amounts were estimated using various measurement bases, depending on the type of asset or liability. For the purposes of determining a deemed cost, immovable assets transferred were valued using either the municipal valuations, comparable sales value or depreciated replacement cost. For movable assets a depreciated replacement cost was used. Financial assets and liabilities at fair value was used and other liabilities were transferred at the best estimate at the date of transfer. The DPWI transferred functions on two separate occasions, effective 18 November 2013 and 30 March 2015 respectively. For measurement purposes, 1 April 2013 and 1 April 2014 were used respectively. For further details refer to note 1.29.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.1 Significant judgement and sources of estimation uncertainty (continued)

1.1.3 Useful life and residual values

The estimated useful lives of property, plant and equipment, investment property and intangible assets are assessed annually and is dependent on the condition of the assets. Management applies judgement in assessing the condition of the assets. The residual values are estimated to be zero as the PMTE will be utilising these assets over their entire economic life, unless clear evidence exists to the contrary.

Refer to note 1.6 for the accounting policies on estimated useful lives for property, plant and equipment, note 1.7 for investment property and note 1.9 for intangible assets.

1.1.4 Classification of accommodation charges as lease revenue

As the intention of the PMTE is to provide accommodation at values that are directly equal to the value of the service being delivered, the PMTE categorises all accommodation charges, with the exception of prestige accommodation, as revenue from exchange transactions, notwithstanding the fact that this revenue may or may not equal the value of the service delivered.

The amount for prestige accommodation is determined in accordance with the ministerial handbook. The ministerial handbook allows for the ministers to stay free of charge in the first property provided to him or her. For the second property, the ministerial handbook requires the minister to be charged a percentage of his or her salary as a rental fee. This rental fee does not approximate the value of the service provided to the prestige clients. Therefore, the receivable is classified as a statutory receivable and the revenue is classified as a non-exchange transaction.

1.1.5 Classification and measurement of leases

Management uses judgement to determine if a lease is classified as an operating or a finance lease. Management's judgement is based on whether risk and rewards incidental to ownership have been transferred.

Cognisance has been taken of the fact that client departments generally extend the period for which they lease premises through the PMTE where these properties are rented from the private sector. It is difficult to conclude that it is certain that the PMTE (as lessee) will always extend the lease term of leasehold property at inception of the lease because of the general occupation trend of its client departments. Taking everything into consideration, management is of the opinion that the risk and rewards incidental to ownership is not transferred during the lease term from either the lessee's or the lessor's perspective.

The same terms and conditions included in the underlying lease agreements with the landlord is used to determine the relevant presentation for lease-out arrangements.

The PMTE considers leases to be month-to-month leases when the underlying lease agreements on leasehold properties have expired and the asset is still being utilised by the client department.

As the lease terms and conditions are not determinable for month-to-month leases and freehold inter-governmental accommodation, the lease revenue and expenditure are recognised when due.

1.1.6 Provision for maintenance

Management developed a model to determine the amount due to suppliers for work performed when job cards are outstanding and/or the value of the service has not been confirmed. The model is based on historical trends and costing data. The base line data is determined on actual information for payments made during 2016. For the purpose of determining the average time of service to be rendered, management stratified the data of calls logged and payments made in accordance with the severity of the incident. For the purpose of determining the average price per incident, the data was stratified based on the category of maintenance call. The average price is adjusted for the effect of inflation on an annual basis. The actual amounts due, on an individual basis, may differ significantly from the provision made.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.1 Significant judgement and sources of estimation uncertainty (continued)

1.1.7 Impairment

Impairment of receivables measured at cost or amortised costs

Accommodation charges from client departments are allocated through voted funds and are due within 30 days from invoice date. If client departments do not pay within 30 days, the receivable is considered for impairment.

An impairment loss is recognised firstly on individually significant receivables. Thereafter an impairment loss is recognised on a group of receivables with the same credit risk. Impairment assessments are based on objective evidence as a result of one or more events that occurred during the reporting period. For clients which have defaulted, management makes judgements based on history to determine if the receivable/group of receivables have to be impaired. The actual write-offs may differ significantly from the impairment losses recognised.

Impairment of receivables is based on management's best estimate of the expected cash flows for amounts that are outstanding for longer than the normal payment terms discounted at the current rate applicable to debts owed to the state. Where management cannot determine the future payment date, management discounts from invoice date for 12 months after year-end.

The discount rate used for impairment purposes is not adjusted for the different classes of receivables as the majority of the debt is with government departments.

Impairment of non-current assets

The PMTE uses the depreciated replacement cost method for measuring the impairment of majority of the immovable assets. Depreciated replacement cost is based on the current building indices factoring in the current condition rating assessed.

Assets under construction are considered for impairment when the project is cancelled, halted or delayed. For furniture, machinery, computer, office and other equipment, the asset is considered for impairment when it is no longer used, physically damaged or there is a significant change in the condition of the asset.

1.1.8 Significantly delayed projects

A project is regarded as 'significantly delayed' when it has been delayed by more than 50% of the planned project period.

Projects are regarded as technically delayed, for financial statement disclosure purposes, when the project has not yet reached practical completion status at reporting date and the 'planned project period' has expired before the reporting date

Projects that are 'Completed', 'Cancelled' or in the 'Planning and Design stage' are excluded from the population for the purpose of the 'significantly delayed' disclosures.

1.1.9 Classification of immovable assets

Judgement is applied when classifying immovable assets between property, plant and equipment, investment property and heritage assets. Consideration is given to the type of property, the purpose for which the property is held, and the occupant. The main factor considered is whether PMTE holds the asset either for service delivery (in accordance with government objective), resulting in property, plant and equipment, or for capital appreciation and/or earning or rentals, resulting in investment property, or for future generations resulting in heritage assets. Where state property is rented out to another government entity or public service employees to provide cost effective accommodation services or for social services, these properties are classified as property, plant and equipment rather than investment property as the PMTE holds these assets to deliver on its mandate rather than to earn rentals or capital appreciation.

The Standard of GRAP on Investment Properties (GRAP 16) requires undeveloped land, for which no purpose has been determined, to be classified as investment property. However, where the land is acquired for strategic purposes, the land is to be classified as property, plant and equipment. In considering the classification of undeveloped land, the PMTE considers how it acquired the land and whether the land is being used. Where the land was acquired through expropriation or a result of legislation, the PMTE classifies the land as property, plant and equipment rather than investment property, as it is assumed to be acquired for strategic purposes in accordance with government's policies and aims.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.1 Significant judgement and sources of estimation uncertainty (continued)

PMTE determines the intended use of a facility by evaluating the characteristics of the facility against the criteria for Investment Property. The criteria for Investment Property are as follows:

- The current occupant (lessee) is not an organ of state; and
- Future occupants of the facility will most probably not be an organ of state; and
- There is no intention for the facility to be occupied in future by an organ of state for the production or supply of goods
 or services, for administrative purposes or for executing its mandate; and / or
- The facility is held in its entirety, for long-term/future capital appreciation rather than for short-term sale in the ordinary course of operations; or
- The facility is specifically earmarked as Investment Property (i.e. for rental to occupants that are not organs of state; or for development with the sole intention to be leased to occupants that are not organs of state, or capital appreciation); and / or
- A vacant building/facility is held to be leased out under one or more operating leases on a commercial basis to
 external parties;
- The intended use is of a dual nature/purpose. A facility will only be classified as Investment Property if the main purpose and most significant use of the facility is to earn rentals or capital appreciation; or
- The facility is being constructed or developed for future use as investment property.

Heritage assets may be used for administrative purposes. Management uses judgement to determine whether a significant portion of the heritage asset is utilised for office accommodation. If a significant portion of the heritage asset is utilised for administrative purposes, the asset is classified as property, plant and equipment under the Standard of GRAP on *Property, Plant and Equipment* (GRAP 17).

For purposes of classifying these non-financial assets, that are subject to impairment, either as cash-generating or non-cash generating, PMTE applied the following criteria:

- The purpose for which the asset is held;
- The intention to earn commercial (profit-making) return on the property;
- The ability to earn commercial return on the property; and
- The restrictions on the use of the property by PMTE.

The PMTE, as a trading entity of the DPWI, is accountable for these assets and needs to maintain these assets on behalf of national government. It cannot use these assets for any other purpose than to deliver on its mandate (consistent with GIAMA and the PFMA). The PMTE has to provide accommodation to other departments to enable them to deliver on their mandates. Where the PMTE does ask market related rent on property that is not utilised by other departments, it is not considered material and therefore all non-financial assets have been classified as non-cash generating for impairment purposes.

1.1.10 Principal - agent relationships

The PMTE's mandate is to manage the accommodation and infrastructure needs of national departments. Should the PMTE be unable to satisfy the accommodation needs of a particular client department through the use of state-owned property, the PMTE would lease the required property from a private landlord, on behalf of the client department, and for their beneficial occupation. Consideration was given as to whether the PMTE is acting as an agent on behalf of the client departments, as a result of carrying out these activities.

Management, however, is of the opinion that the decision making ability, the accountability, the credit risk and the value added processes all rest with the PMTE. This indicates that the PMTE is the principal with regards to the lease arrangement with the respective landlords.

Client departments occupying properties are liable for the municipal services charges incurred in utilising those properties. The PMTE offers a service of paying the municipal service charges on behalf of the client departments and then recovering those costs directly from the client department. For this service, the PMTE charges a 5% management fee which is invoiced and recovered from the client department. The PMTE is acting as an agent with regards to the payment and recovery of these municipal service charges. The management fee for rendering this service is recognised as revenue for the PMTE.

The PMTE is using certain public entities to manage projects on its behalf and is liable to pay a management fee to these entities for the services delivered by them. In these arrangements, the PMTE still remains the principal and is still fully accountable for the work performed.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.1 Significant judgement and sources of estimation uncertainty (continued)

1.1.11 Related party disclosure

The Standard of GRAP on Related Party disclosures (GRAP 20) provides exemption from detailed disclosures where those transactions are on:

- Normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those
 which it is reasonable to expect the PMTE to have adopted, if dealing with that individual entity or person in the
 same circumstances; and
- Terms and conditions within the normal operating parameters established by our mandate.

In the absence of a pricing strategy for leases, judgement is made to determine the disclosures around related party transactions based on the nature of the transactions and the associated terms. In addition, many services have been rendered in-kind to the PMTE stemming from its relationship with the DPWI. Due to the nature of these transactions, where amounts could not be measured reliably, only a narrative disclosure is made. This is in line with the principle in the Standard of GRAP on Revenue from Non-exchange Transactions (GRAP 23) to not recognise certain services-in-kind where it cannot be measured reliably. It is difficult to measure the value of these services and they are usually consumed within the period. Where amounts could be reliably measured, they have been recognised.

1.2 Receivables from exchange transactions

Receivables from exchange transactions are recognised when exchange revenue is due to the PMTE through legislation (statutory receivables) or in accordance with an agreement (financial assets). Refer to note 1.15 and 1.16 respectively.

1.3 Receivables from non-exchange transactions

Receivables from non-exchange transactions are recognised when non-exchange revenue is due to the PMTE through legislation (statutory receivables) or in accordance with an agreement (financial assets). Refer to note 1.15 and 1.16 respectively.

1.4 Leases

The PMTE classifies lease agreements in accordance with risk and rewards incidental to ownership.

The lease is classified as a finance lease where:

- (a) the lessor transfers substantially all the risks and rewards to the lessee;
- (b) the lease transfers ownership of the asset to the lessee by the end of the lease term;
- (c) the lessee has the option to purchase the asset at a price which is expected to be sufficiently lower than the fair value at the date the option becomes exercisable for it to be reasonably certain, at the inception of the lease, that the option will be exercised;
- (d) the lease term is for the major part of the economic life of the asset even if title is not transferred;
- (e) at the inception of the lease the present value of the minimum lease payments amounts to at least substantially all of the fair value of the leased asset;
- (f) the leased assets are of a such a specialised nature that only the lessee can use them without major modifications.

All other leases are classified as operating leases

Finance leases - PMTE as a lessee

Where the PMTE has assessed itself to be a lessee to a finance lease arrangement, it recognises a finance lease liability and a related leasehold asset, which would be disclosed as part of property plant and equipment. If there is no reasonable certainty that the lessee will obtain ownership by the end of the lease term, the asset shall be fully depreciated over the shorter of the lease term and its useful life.

The PMTE recognises finance lease liabilities resulting from finance leases as a liability in the Statement of Financial Position. Minimum lease payments is apportioned between the finance charge and the reduction of the outstanding liability. Such liabilities are presented as a payable at an amount equal to the net obligation of the lease. Interest expense is recognised based on the interest rate implicit in the finance lease. Where the fair value of the assets are not available to determine the implicit interest rate in the lease, the PMTE uses the rate applicable to debt owed by the state. The liability is recognised at the lower of the fair value of the leased asset or the present value of the minimum lease payments.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.4 Leases (continued)

Operating leases - PMTE as a lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term where the lease term exceeds one month; except where the terms and conditions have not been determined or are in the process of being re-negotiated. Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue. The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis. Lease revenue is presented as accommodation charges in the Statement of Financial Performance and notes to the financial statements.

The PMTE recognised month-to-month leases as revenue from exchange transactions as and when the revenue is due.

Operating leases - PMTE as a lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term where the lease term exceeds one month; except where the terms and conditions have not been determined or are in the process of being renegotiated. The difference between the amounts recognised as an expense and the contractual payments is recognised as an operating lease asset or liability.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.5 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and other short-term liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

Cash and cash equivalents are classified as financial instruments (refer to note 6).

1.6 Property, plant and equipment

Property, plant and equipment are tangible non-current assets that are held for use in the production or supply of goods or services, rental to others, strategic or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the entity; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost and subsequently at cost less accumulated depreciation and accumulated impairment losses, except for assets under construction, land and heritage assets, these are subsequently measured at cost less accumulated impairment losses. Land is not depreciated.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Major spare parts and standby equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and standby equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment. Major inspection costs which are a condition of the continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Heritage assets assessed as having a dual function of being a heritage asset and providing accommodation services are recognised as property, plant and equipment, if a significant portion of the heritage asset is utilised for office accommodation. Refer to note 1.8 for the accounting policy for other heritage assets.

With the exception of assets acquired through the transfer of functions under common control which is measured at deemed cost as the carrying value at the date of transfer, where property, plant and equipment is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.6 Property, plant and equipment (continued)

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset only when it is probable that the future economic or service potential benefit associated with that item will flow to the PMTE and the cost thereof can be reliably measured.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. These components are depreciated separately.

Depreciation is calculated on a straight line basis over the expected useful lives of each item. Depreciation is charged to the surplus or deficit, unless it is included in the carrying amount of another asset. Depreciation commences on an asset when it is in the condition necessary for it to be capable of operating in a manner intended by management.

Assets under construction are ready for their intended use once a completion certificate or occupational certificate has been issued. At this point depreciation will commence.

The useful life, depreciation method and a residual value for property, plant and equipment are reviewed annually. Any changes are recognised as a change in accounting estimates and included in depreciation.

The useful lives of items of property, plant and equipment have been assessed as follows:

| | Average useful life |
|---|--|
| ing and improvements (including components) | |
| Low rise buildings (up to 4 floors) | 12 - 50 years |
| High rise buildings (more than 4 floors) | 40 - 80 years |
| Warehouse / garage / storerooms | 40 - 60 years |
| Prisons | 100 years |
| Barracks | 12 - 50 years |
| Dwellings | 40 - 60 years |
| Temporary structures | 30 years |
| Roads, harbours and mines | 12 - 35 years |
| Boundary fences on vacant land | 15 years |
| Water and other infrastructure | 20 - 60 years |
| Airport runways | 40 - 60 years |
| Dams and reservoirs | 100 years |
| Other | 12 - 50 years |
| | indefinite useful lives |
| ture and office equipment | 5 - 15 years |
| cles | 5 - 10 years |
| outer equipment | 3 - 15 years |
| r machinery and equipment | 10 - 30 years |
| | ing and improvements (including components) Low rise buildings (up to 4 floors) High rise buildings (more than 4 floors) Warehouse / garage / storerooms Prisons Barracks Dwellings Temporary structures Roads, harbours and mines Boundary fences on vacant land Water and other infrastructure Airport runways Dams and reservoirs Other ture and office equipment cles puter equipment r machinery and equipment |

The PMTE assesses annually at each statutory reporting date whether there is any indication that an asset may be impaired. If such indication exists, the PMTE estimates the recoverable service amount or recoverable amount for non-cash- generating and cash generating assets respectively. An impairment loss is recognised where the carrying amount exceeds the asset's recoverable service amount or recoverable amount as applicable.

The PMTE assesses annually at each statutory reporting date whether there is any indication that an impairment loss recognised in prior period for an asset may no longer exist or may have decreased. If such indication exists, the PMTE estimates the recoverable service amount or recoverable amount of that asset. Any impairment loss recognised in prior periods for an asset is only reversed if there has been a change in the estimated use to determine the asset's recoverable service amount since the last impairment loss was recognised. Reversals of impairment is limited to the carrying amount of the asset had no impairment been recognised for the asset in prior periods.

Impairment losses and reversals of impairment losses are recognised in the surplus or deficit in the period in which the event occurs.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. If a component is replaced, the carrying amount of the existing component is derecognised and the value of the new component is recognised.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.6 Property, plant and equipment (continued)

The PMTE is not allowed to dispose of or transfer immovable assets under its custodianship unless approved by the Minister of Public Works and Infrastructure or his delegated official, considering the restriction of the State and Land Disposal Act (Act No. 48 of 1961).

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

1.7 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the entity, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost, including transaction costs. Investment property is subsequently carried at cost less accumulated depreciation and any accumulated impairment losses, except for land. Land is not depreciated.

With the exception of assets acquired through a transfer of functions under common control which is measured at carrying amount, where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Depreciation is calculated on a straight line basis over the expected useful lives of each item. Depreciation is charged to surplus or deficit. Depreciation commences on assets when they are in the condition necessary for them to be capable of operating in the manner intended by management. Depreciation ceases when the asset is disposed.

ItemUseful lifeLandindefiniteBuildings and improvements12 - 100 years

Refer to note 1.6 for a detailed breakdown of the useful lives of the building and improvements.

Assets under construction are ready for their intended use once a practical completion certificate or occupational certificate has been issued. At this point depreciation will commence.

The useful life, depreciation method and residual value for investment property are reviewed annually. Any changes are recognised prospectively as changes in accounting estimates in surplus or deficit.

Impairment and reversals of impairment are recognised in surplus or deficit in the period in which the event occurs.

The PMTE is not allowed to dispose of or transfer immovable assets under its custodianship unless approved by the Minister of Public Works and Infrastructure or his delegated official, considering the restriction in the State and Land Disposal Act (Act No. 48 of 1961).

Items of investment property assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

Gains and losses on the derecognition of investment properties, including impairment and impairment reversals, are treated similarly to gains and losses for property, plant and equipment (refer to note 1.6).

1.8 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.8 Heritage assets (continued)

PMTE recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the entity, and the cost or fair value of the asset can be measured reliably.

Heritage assets are measured at cost.

With the exception of assets acquired through the transfer of functions under common control which is measured at deemed cost, where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Heritage assets assessed as having a dual function, of which a significant portion is held for the provision of accommodation or administrative purposes, are recognised and disclosed as property, plant and equipment.

The cost of an item of heritage assets is the purchase price and other costs directly attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Heritage assets that cannot be reliably measured are not recognised, but relevant information about these assets are disclosed in the notes, if applicable. Any costs incurred subsequently shall be recognised in surplus or deficit as incurred.

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

Heritage assets are not depreciated as they are regarded as having an indefinite useful life but are annually assessed for impairment. If any such indication exists, the PMTE estimates the recoverable amount or the recoverable service amount of the heritage asset.

An impairment loss is recognised where the carrying amount exceeds the recoverable service amount for non-cash generating assets. Impairment losses and reversals of impairment are recognised in surplus or deficit in the period when the event occurs.

PMTE derecognises heritage assets on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised.

1.9 Intangible assets

The PMTE recognises intangible asset when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the entity; and
- the cost or fair value of the asset can be measured reliably.

Where the PMTE acquires the rights to use an asset, other than exercising its rights through legislation, it classifies these as intangible assets.

With the exception of assets acquired through the transfer of functions under common control which is measured at carrying amount, where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Intangible assets are initially recognised at cost and subsequently carried at cost less any accumulated amortisation and any impairment losses.

The amortisation period, the amortisation method and the residual values of the intangible assets with finite useful lives are reviewed annually. Intangible assets with indefinite useful lives are tested annually for impairment. Any changes are recognised as a change in accounting estimate in surplus or deficit.

Amortisation is recognised in surplus or deficit on a straight-line basis over the estimated useful lives of the intangible assets, unless such useful lives are indefinite. Amortisation commences on the asset when they are in the condition necessary for them to be capable of operating in a manner intended by management.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.9 Intangible assets (continued)

ItemUseful lifeComputer software5 years

Items of intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an intangible assets is included in surplus or deficit when the asset is derecognised.

Impairments and reversals of impairments are recognised in surplus or deficit in the period that the event occurs. Losses or gains on impairments and impairment reversals are treated similarly to gains and losses for property, plant and equipment (refer to note 1.6).

1.10 Payables from exchange transactions

The PMTE recognises payables from exchange transactions where liabilities result from counter performance by respective parties as a result of exchange transactions.

Payables from exchange transactions are initially measured at fair value. Where the outflow is expected to be cash or another financial asset, the payable is classified as a financial liability.

The PMTE recognises in payables an amount for accruals where an estimate is made of the amounts due for goods or services that have been received or supplied, but an invoice or formal request for payment has not been received at the reporting date as well as outstanding invoices.

1.11 Employee benefits

Short-term employee benefits

The PMTE recognises an undiscounted amount of short-term benefits due to employees in exchange for the rendering of services by employees as follows:

- As a liability in cases where the amounts have not yet been paid.
- Where the amount paid exceeds the undiscounted amount of the benefits due, the PMTE recognises the excess as an asset to the extent that the overpayment will lead to a reduction of future payments or a cash refund.
- As an expense, unless the PMTE uses the services of employees in the construction of an asset and the benefits
 received meet the recognition criteria of an asset, at which stage it is included as part of the cost of the related
 property, plant and equipment, investment property or intangible asset item.

Leave benefits

The PMTE recognises the expected cost of short-term employee benefits in surplus or deficit, in the form of compensated absences (paid leave) when the employees render services that increase their entitlement to leave benefits.

The expected cost of accumulating leave benefits is measured as the additional amount that the PMTE expects to incur as a result of the unused entitlement that has accumulated at the reporting date.

Performance and service bonuses

The PMTE recognises the expected cost of performance or service bonus payments where there is a present legal or constructive obligation to make these payments as a result of past events and a reliable estimate of the obligation can be made. A liability for service bonus is accrued on a proportionate basis as services are rendered. A liability for performance bonus, which is based on the employee's performance in the applicable year, is raised on the estimated amount payable in terms of the incentive schemes. The PMTE considers the present obligation to exist when it has no realistic alternative but to make the payments related to performance bonuses.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.11 Employee benefits (continued)

Retirement and medical benefits

All permanent employees are members of the Government Employees Pension Fund (GEPF), which is a defined benefit plan. Employees are contributing 7.5% of their pensionable salary towards the fund on a monthly basis. PMTE contributes a further 13% to the fund on behalf of the employees. Obligations are limited to the contributions made and any shortfall in the GEPF is made good by the State, therefore the PMTE accounts for the fund as a defined contribution plan. Payments are charged as an expense to employee cost in surplus or deficit in the same year as the related services is provided.

Long service awards

The PMTE recognises the expected cost of short-term employee benefits in surplus or deficit, in the form of long service awards, when the employees render services for a period that entitles them to long service award benefits as prescribed by DPSA policies.

1.12 Retention liabilities

A retention liability is recognised as a financial liability where monies due to a contractor are withheld for a set period of time during which the PMTE has an enforceable right to have defects remedied by the contractor. The measurement of the retention liability is the same as payables from exchange transactions which have been classified as financial liabilities. The liability is derecognised when the liability is settled or when the contractor defaults and is not entitled to settlement.

1.13 Provisions and contingencies

Provisions are recognised when:

- the entity has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date, discounted to present value where the time value of money is expected to be material.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Provisions where the timing of the outflow is uncertain is classified as current liabilities.

Contingent assets are disclosed where the PMTE has a possible inflow of resources but the inflow did not meet the recognition criteria of an asset. Contingent liabilities are disclosed where a liability is subject to an uncertain event or the outflow is only assessed to be possible.

Contingent assets and contingent liabilities have been based on the best estimate available at the time of preparing the financial statements.

Contingent liabilities relating to litigations have been based on the assessment of the estimated claim against the PMTE as at the end of the reporting period. Contingent liabilities on retentions, leases, unscheduled maintenance and municipal rates and services are based on management's calculations of the possible inflows/outflows expected to be settled.

1.14 Reserves

The PMTE's reserves are made up of accumulated surplus.

Accumulated surplus is mainly built up to ensure adequate rehabilitation and maintenance of state owned infrastructure and future infrastructure development.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.15 Statutory receivables and payables

Classification, recognition and measurement

Statutory receivables and payables arise from the right to receive cash or make payments in terms of legislative requirements. The PMTE will recognise receivables when it obtains the right to receive assets in terms of legislation, at the amount determined in the legislation (i.e. transaction price), which is the fair value at initial recognition. Thereafter the receivable will be assessed for impairment.

Payables arising from legislatory requirements are measured at the amount determined in legislation (i.e. transaction price).

Statutory receivables and payables are not discounted.

Impairment of receivables measured at cost

At each end of the reporting period, the PMTE assesses all receivables to determine whether there is objective evidence that the asset or group of assets have been impaired. The inability to redeem amounts due based on the payment history is considered to be indicators of impairment.

If there is objective evidence that an impairment loss on receivables has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows, excluding future credit losses not yet incurred. Impairment loss on receivables is impaired directly to the receivables. Receivables at cost are discounted at a risk free rate adjusted for the risk associated with the debt. Impairment losses are recognised in surplus or deficit as expenses.

Impairment losses are reversed when an increase in the receivable's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to the restriction that the carrying amount of the financial asset at the date that the impairment is reversed does not exceed the carrying amount that would have been recognised had the impairment not been recognised. The amount of the reversal is recognised in surplus or deficit.

1.16 Financial instruments

Classification, recognition and measurement

The PMTE recognises a financial asset or a financial liability when it becomes a party to the contractual arrangement in the instrument.

The PMTE recognises financial assets using trade date accounting.

The PMTE does not offset a financial asset and a financial liability unless a legally enforceable right to offset the recognised amounts currently exists and the PMTE intends to settle on a net basis or to realise the asset and settle the liability simultaneously.

Interest relating to a financial instrument or a component of a financial instrument is recognised as revenue or expense in surplus or deficit.

The PMTE's financial instruments consists only of cash and cash equivalents, including the bank overdraft and non-derivative instruments such as leases, receivables and payables with no or minimal transaction costs.

All financial instruments are initially measured at fair value and subsequently at amortised cost using the effective interest method, except for leases (refer to note 1.4).

Transaction costs in respect of financial instruments which are not at fair value through surplus or deficit are included in the initial measurement of the instrument.

Interest is charged on debt outstanding exceeding the normal credit terms at the rate applicable for debt owed to the State, except for debt owed by government institutions.

The effect of payment for short term receivables outstanding for longer than the 30 days is considered during the impairment assessment.

Impairment of assets

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.16 Financial instruments (continued)

The PMTE assesses at the end of each reporting period whether there is any objective evidence that a financial or non-financial asset or group of assets are impaired.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred). Impairment loss on receivables is accounted for directly to the receivables. Financial assets at amortised cost are discounted to the original effective interest rate (i.e. the effective interest rate computed at initial recognition). The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly to the receivable. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date of reversal. The amount of the reversal is recognised in surplus or deficit.

At the end of each reporting period the entity assesses all financial assets, other than those at fair value through surplus or deficit, to determine whether there is objective evidence that a financial asset or group of financial assets have been impaired.

Non-financial assets measured at cost:

Where the carrying amount of a non-financial asset exceeds its recoverable service amount, the asset is considered impaired and is written down to its recoverable amount. An impairment loss is recognised immediately in surplus or deficit. In assessing the value in use, the PMTE has adopted the depreciated replacement cost approach.

For further details regarding impairment of property, plant and equipment, investment property, heritage assets and intangible assets, refer to note 1.6.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.16 Financial instruments (continued)

Derecognition

Financial assets

PMTE derecognises financial assets using trade date accounting. The entity derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the entity, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

Financial liabilities

PMTE derecognises a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on *Revenue from Non-exchange Transactions*.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.17 Revenue from exchange transactions

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Revenue earned from accommodation charges is classified as lease revenue (refer to note 1.4 for further details on recognition and measurement of lease revenue). Accommodation charges are measured based on:

- the cost of leasing in (in the case where property is leased in from the private sector);
- the budget devolution as agreed upon with the client departments (in the case of state owned accommodation leased to client departments);
- approved accommodation charge in consultation with National Treasury for state accommodation; or
- the market related rental (in the case of state owned accommodation leased to the private sector and individuals).

Accommodation charges disclosed in the financial statements consists of:

- Leasehold inter-governmental, which refers to lease revenue earned from assets which are owned by the private sector, which is then sub-leased to client departments;
- Freehold inter-governmental, which refers to lease revenue from state owned assets leased to client departments;
 and
- Freehold private, which refers to lease revenue from state owned assets leased to the private sector and individuals

Revenue from construction contracts is classified as revenue from exchange transactions and recognised by reference to the stage of completion of the contract when the outcome of a construction contract can be estimated reliably. When the outcome of a construction contract cannot be estimated reliably, construction revenue is recognised to the extent of contract costs incurred that are likely to be recoverable in the period in which they are incurred. An expected loss on a contract is recognised immediately in the surplus or deficit in the period in which it was incurred. Refer to note 1.20 for further details.

Interest is recognised, in surplus or deficit, using the effective interest rate method. Interest is inter alia earned on advances provided on projects conducted by implementing agents and outstanding debt.

The PMTE pays municipal services on behalf of the client departments and earns 5% management fee on the value of the invoice. The management fee earned is recognised as revenue from exchange transactions in the surplus or deficit. Any amounts owed or overpaid on the management fee is recognised either as a receivable or payable from the exchange transactions as appropriate.

Other revenue from exchange transactions is recognised when it is probable that future economic benefits or service potential will flow to the entity and these benefits can be measured reliably. Revenue will be recognised in the surplus or deficit when it becomes due to the PMTE. Revenue is measured at the fair value of the consideration received or receivable, net of any trade discounts and volume rebate.

1.18 Revenue from non-exchange transactions

Non-exchange transactions are defined as transactions where the entity receives value from another entity without directly giving approximately equal value in exchange.

The PMTE recognises the inflow of resources from a non-exchange transaction as revenue when it controls the asset, except in cases where a liability or equity is recognised in respect of that inflow. These liabilities are classified as payables from non-exchange transactions until the conditions relating to the revenue has been satisfied. Revenue from non-exchange transactions is measured initially at fair value.

Transfer payments received from the DPWI in order to fund operations and manage properties under the custodianship of DPWI, are referred to as augmentation and is classified as revenue from non-exchange transactions.

Revenue earned from freehold prestige accommodation charges is classified as lease revenue. Freehold prestige accommodation charges are recognised based on the reduced market related rental as per the ministerial handbook.

Where services are received in-kind and a reliable estimate can be made, the PMTE recognises the related revenue. In all other cases, the PMTE only discloses the nature of the transactions.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.19 Expenditure

Expenditure is classified in accordance with the nature of the expenditure.

The PMTE recognises expenditure in surplus or deficit when a decrease in future economic benefits or service potential relates to a decrease in an asset or an increase in a liability, other than those relating to distributions to owners.

The PMTE recognises expenses immediately in surplus or deficit when no future economic benefits or service potential are expected or when and to the extent that, future economic benefits or service potential do not qualify or cease to qualify for recognition as an asset in the Statement of Financial Position.

The PMTE also recognises expenses in surplus or deficit in those cases when a liability is incurred without the recognition of an asset, for example, when a liability under a court ruling arises.

Interest expense is recognised as an expense in surplus or deficit in the period in which they are incurred, using the effective interest method.

1.20 Construction contracts and receivables

Expenditure incurred in capital construction projects are classified as construction costs and recognised in the Statement of Financial Performance when the amount is recoverable based on the work completed. The revenue is recovered on a full cost recovery basis. The related receivable is recognised when the amount becomes recoverable.

1.21 Irregular, Fruitless and wasteful expenditure

Irregular, fruitless and wasteful expenditure, as defined by the PFMA, and material losses through criminal conduct is recognised as expenditure in the surplus or deficit according to the nature of the payment and disclosed separately in notes 31 and 32. When an amount becomes recoverable, a receivable is recognised. Any receivables recognised as a result of irregular, fruitless and wasteful expenditure or material losses through criminal conduct, are subject to an annual impairment assessment.

1.22 Related parties

The PMTE is controlled through the DPWI at National Government level. Other than management and their close family, only parties within the national sphere of government and entities reporting to National Departments that are subject to common control, is considered related parties.

Management are those persons responsible for planning, directing and controlling the activities of the entity, including those charged with the governance of the entity in accordance with legislation, in instances where they are required to perform such functions. Management include officials like the Minister, the Minister's advisor, members of the Executive Committee (EXCO), chairpersons of significant committees, head of units and regional managers. Where the remuneration of management is not accounted for by the PMTE (as included in note 35), the remuneration is not included in the disclosure. This includes the remuneration of the Chief Financial Officer, the Director-General and the Minister of Public Works and Infrastructure. Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, management in their dealings with the entity.

Only transactions with related parties not at arms' length or not in the ordinary course of business are disclosed in note 35. Movable assets that have not been transferred specifically to the PMTE are not recognised by the PMTE but are recorded by the DPWI.

1.23 Budget information

The PMTE presents a comparison of budget amounts and actual amounts as a separate additional financial statement. The approved and final budget amounts are prepared on a modified cash basis. The budget is prepared based on the nature of the revenue and the expenditure. The actual amounts (prepared on an accrual basis) are adjusted for basis differences for comparability purposes.

The PMTE budgets for revenue including the transfer payment received through the DPWI. The PMTE budget is part of the overall DPWI vote.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.24 Commitments

Items are classified as commitments when the PMTE has committed itself to future transactions that will normally result in the outflow of cash. The current year's estimates are based on unrecognised capital and maintenance expenditure which has been approved and either contracted for or an order has been issued to the supplier relating to immovable assets.

See Notes: 8, 10, 7, 9 for additional disclosure. The PMTE also manages other projects on behalf of client departments which are not in respect of the PMTE's immovable assets. These agency commitments have been disclosed in note 34.

1.25 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date);
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The entity will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The entity will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.26 Going concern assumption

These annual financial statements have been prepared on the going concern basis. Refer to note 38.

1.27 Comparative figures

Comparative figures have been adjusted to correct errors identified in the current year but relating to prior years. The effect of the restatements are disclosed in note 37.

1.28 Deferred revenue

The PMTE recognises an amount for deferred revenue where the leasing revenue (accommodation charges - freehold intergovernmental) recognised from client departments is deferred until the project is ready for use and capitalised under immovable assets.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

1.29 Transfer of functions between entities under common control

The transfer of functions from entities under common control are accounted for by the PMTE by recognising the assets acquired and liabilities assumed at the carrying amount measured in accordance with the Standards of GRAP. The difference between the assets and liabilities is recognised in accumulated surplus or deficit.

The PMTE acquired the following functions and the related assets and liabilities from the DPWI on 30 November 2013:

- Asset Investment Management
- Property Management
- Facilities Management
- Key Account Management
- Regional Finance Units

The transitional provisions for the recognition and measurement of this transfer expired on 31 March 2017.

The PMTE acquired the following functions and the related assets and liabilities from the DPWI on 30 March 2015:

- Inner City Regeneration
- Projects and Professional services
- Regional co-ordination
- Supply Chain Management
- Regional support and Regional Managers

The transitional provisions for the recognition and measurement of this transfer expired on 31 March 2018

1.30 Entity-wide disclosure

The PMTE Operates within all geographical provinces with South Africa through its 11 regional offices and head office. Each Province has 1 Regional office each, except for Gauteng which has two physical regional offices plus head office and the Eastern Cape which has 2 regional offices. The Standard on Segmental Reporting (GRAP 18) requires an entity to disclose, where information is available without incurring excessive costs of disclosure, specified information relating to those said geographical areas as follows:

- (a) external revenues from non-exchange transactions and external revenues from exchange transactions attributed to the geographical areas in which it operates;
- (b) total expenditure attributed to the geographical areas; and
- (c) non-current assets2 other than financial instruments, deferred tax assets (where applicable), post-employment benefit assets, and rights arising under insurance contracts for the geographical areas.

The PMTE has assessed the availability of such information and the information is only available at geographical area in respect of expenditure. Within the expenditure attributed to each geographical area, where the expenditure is inextricably linked with an item of evenue or non-current assets where it is impracticable to allocate per geographical area, then such expenditure has been allocated to the head office. This includes Impairment losses, depreciation on immovable properties and straight lining of operating leases.

The costs to develop reports and interfaces to meet the remainder of the requirements of the entity-wide disclosure of GRAP 18 is deemed to be excessive.

The Entity Wide disclosure to the extent that it is practicable and available is disclosed in Annexure A on page 62.

Annual Financial Statements for the year ended 31 March 2020

2. Standards of GRAP issued but not yet effective

2.1 Standards utilised in developing accounting policies and disclosure (with limited impact)

The PMTE has utilised the principles of the Standards of GRAP listed below in disclosing and accounting for relevant transactions. As a result, there will be limited impact on the financial statements when the Standards become effective.

Standard/ Interpretation:

- Related Parties (GRAP 20)
- Statutory receivables (GRAP 108)

2.2 Standards not yet effective (with possible extended impact)

The PMTE has not applied the standards below which have been approved but not yet effective. The adoption of this Standard is not expected to have an impact on the results of the PMTE, but may result in more disclosure than is currently provided in the financial statements.

Standard/ Interpretation:

- Accounting by Principals and Agents (GRAP 109)

2.3 Standards not yet effective (with no impact)

The standards and interpretations listed below have been approved but are not yet effective. It is unlikely that the standards, interpretations and/or amendments will have a material impact on the financial statements of the PMTE once they become effective, as the PMTE does not engage in transactions within the scope of these standards.

Standard/ Interpretation:

- GRAP 34 to 38 on Interests in Other Entities
- GRAP 110 on Living and Non-living Resources
- Service concession arrangements: Grantor (GRAP 32)
- Service concession arrangements where a grantor controls a significant residual value in an asset (IGRAP 17)
- Guideline for the accounting of arrangements undertaken in terms of the National Housing Programme

| | 5 707 345 | 5 420 687 |

The applicable interest rate for outstanding freehold private receivables and debt account receivables for the period is 10.25% (March 2019: 10.25%).

Revenue accruals relates to services rendered to our clients but not yet invoiced.

Included in the prepaid expenses are contractual advances to other government entities which are implementing agents of the PMTE. Interest earned on these advances is included in implementing agents under financial assets above at an average effective interest rate of 4.9% (2019: 7.1%).

The gross amount for recoverable property rates amounts to R80 million (March 2019: R70 million). The full amount is impaired as it relates to amounts not yet invoiced to client departments and third parties and are likely not to be recovered.

Receivables past due but not impaired

All receivables past due were considered for impairments. Refer to note 22 for impairment loss incurred during the period for receivables from exchange transactions.

Individually significant receivables that are impaired

Individually significant receivables are identified if the specific receivable's outstanding balance exceeds 5% of the total outstanding balance for the class of receivable. The factors to identify impairment are similar to the group assessment for impairment. The analysis below shows the total accumulated impairment from individually significant receivables, as a percentage of the gross receivable balance per class of receivable:

| 2 | 2020 2 | 2019 |
|--|--------|------|
| | % | % |

| 5.1 Total operating lease asset - PMTE as lessor | | | |
| Leasehold inter-governmental | | 622 874 | 364 247 |
| Freehold private | | 22 745 | 25 334 |
| | - | 645 619 | 389 581 |
| Total minimum lease receipts - PMTE as lessor | | | |
| Within one year | | 2 526 158 | 2 488 470 |
| In second to fifth year inclusive | | 5 090 341 | 5 411 418 |
| Later than five years | | 2 020 589 | 1 472 652 |
| | _ | 9 637 088 | 9 372 540 |

Leasehold inter-governmental

Based on the nature of leases that are running on a month-to-month and open-ended basis, the related leasehold commitment, is based on the contractually agreed upon notice period. The said amounts have been included in the "within one year" ageing bracket.

The inter-governmental operating leases are sub-lease agreements with various client departments and are on the same terms as those applicable to the lease agreements entered into with the landlords on leasehold property. As a result of the month-to-month and open-ended leasehold commitments included in note below, the equal and opposite amount is included in the PMTE leases above.

Freehold private

The disclosure of the minimum lease payments above relates to state owned properties that are leased out to private parties (accommodation debtor - freehold private).

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

| | 2020 R'000 | 2019 R'000 |
|--|---------------|---------------|
| 5. Operating lease asset/(liability) (continued) | | |
| 5.2 Total operating lease liabilities - PMTE as lessee Operating lease liabilities - leasehold inter-governmental | 648 411 | 364 730 |
| Total minimum lease payments - PMTE as lessee | | |
| Within one year | 2 457 771 | 2 493 363 |
| In second to fifth year inclusive | 4 963 799 | 5 387 416 |
| Later than five years | 2 020 589 | 1 424 189 |
| | 9 442 159 | 9 304 968 |

The PMTE has 2 457 leases of which 1743 have not expired included in the current private leasing portfolio (2019: 2 655 leases of which 1 352 have not expired). The leasehold commitments reflected above have been determined based on the terms and conditions of the relevant lease agreements. Based on the nature of leases that are running on a month-to-month and open-ended basis, the related leasehold commitment, at financial reporting date, is determined taking into account the contractually agreed upon notice period. These amounts have been included as part of the "within one year" ageing bracket.

6. Cash and cash equivalents

The finance lease liability relates to furniture and office equipment, whereby the PMTE takes ownership of the asset upon completion of the contract. These contracts are typically for a period of 36 months. These contracts have no escalation clauses. On 1 March 2018, a new agreement was entered into with regards to cell phones and 3G cards whereby the entity purchases the cell phones up front with no further finance lease obligations.

Municipal services and property rates

The DPWI embarked on Phase II Invoice Verification project to verify claims across all regions made by local municipalities on arrear municipal debts. The project involved detailed and extensive investigation and verification of claims with the local municipalities to ensure only confirmed and valid claims are settled. The next phase of the project will be to confirm the debt with the relevant departments to settle the remaining liability and to recover over payments to municipalities. National Treasury is being consulted to assist with a uniform approach concerning the settlement of the debt and outstanding interest.

(305272)

(14.869)

(561076)

20 595

1 731 241

12 644

As a result of this project, the PMTE has identified prepayments to municipalities amounting to R 666 million (March 2019: R 465 million) included in the prepaid expenses in note 3.

18 879

2 075 069

Debt owed to/due from municipalities but not confirmed has been included in contingent liabilities and contingent assets respectively (refer to note 30). Included in contingent liabilities is an amount of R 25 million (March 2019: R 25 million) relating to interest charged by municipalities which is still in the process of verification.

In addition, the PMTE is not billed on various properties for property rates for which it may be liable in terms of the Municipal Rates Act. The amount of this liability is not reliably measurable due to the uncertainty relating to municipal valuations, applicable rates chargeable, possible exemptions on state owned properties, subdivision of land parcels, timing of receipt of bills, possible changes in ownership and payment arrangements. Therefore management has not recognised a liability in respect of these property rates in the current reporting period. Management is actively engaging with the relevant municipalities in order to rectify possible incorrect billings.

Maintenance

The PMTE appoints contractors to perform repair and maintenance services for its properties. The amount above has been classified as a provision as there is a greater element of uncertainty regarding the amounts and the timing of the work performed. Management is in the process of engaging with contractors to provide all required documentation to validate invoices. Management has developed a model to estimate the obligation for the work performed by contractors (refer to 1.1.6).

The change in estimate relates mainly to the change in the estimated cost to adjust for inflation, as well as a change in the finalisation ratio to account for the possibility that calls can be cancelled after year end.

Legal proceedings

Provisions for legal proceedings consist of claims and litigations for services that have been delivered without an indication of the timing of settlement or the amount of settlement. The provision is based on the amounts confirmed by the legal advisors of the PMTE.

| | | 1 447 626 | 1 402 512 |

27.1 Consulting fees

Ilincluded in consulting fees is an amount of R 47 million (2019: R 17 million) paid to Development Bank of South Africa for business improvement processesses. R 32 million (2019: R52 million) paid to Special Investigating Unit for investigation purposes, and R 18 million (2019: R18 million) paid to COEGA Development Corporation for business continuity and process documentation. The remaining balance of consulting fees relates the assessment and verification of the immovable assets, green building & energy saving consultants and engineering conditional assessment reviews of properties and components.

27.2 Fleet expenses

The PMTE has entered into operating lease arrangements for vehicles. The operating lease for vehicles is on a month-to-month basis and therefore no operating lease asset or liability exists.

27.3 Losses incurred

The losses incurred consists mainly of additional payments made to default contractors on projects.

27.4 Service in kind expense

This amount relates to expenses and movable assets paid for by the PMTE but utilised by the DPWI.

29. Budget differences

Reconciliation of budget to actual

| Net cash flows from operating activities | 3 075 337 |
|--|-------------|
| Net cash flows from investing activities | (2 969 895) |
| Net cash flows from financing activities | (893) |
| | 104 549 |
| Cash deficit | 104 549 |
| Surplus for the year | 2 372 075 |
| Basis difference | 2 476 624 |

The difference between the cash surplus per the Statement of Comparison of Budget and Actual Amounts and the Statements of Financial Performance relates to non-cash movements.

Explanations of material variances between actual amounts and final budgeted amount

Receipts

Accommodation charges - private leases

The variance is attributable to the recurring disputes relating to occupation, the other reason is due to the fact the Department of Defence paid their invoices after year end. PMTE has intensified its recovery management through various actions with specific emphasis on the top six debtors.

Municipal services recovered

Municipal services recovered is relating to the actual recoveries where the PMTE paid municipal services on behalf of clients. It includes recoveries from client departments relating to the water and energy savings programme. The low recovery is attributable to the unpaid Invoices, 90% of the amount is contributed by significant owing Clients Department of Correctional Services/Department of Defence/Department of Justice and South African Police Services. Department of Defence contributes to 48% of total unpaid debt.

Expenditure

Cleaning and gardening

Cleaning and horticultural services are provided to the facilities occupied by PMTE, Justice and Prestige. These services are delivered partially through in-house capability and partially through the use of external service providers. The variances is attributable to the delay in the procurement of new contracts where the existing contracts have expired. The reason for the delay was the extended time it took to obtain the security vetting results.

Repairs

The reasons for underspending on this budget was due to the poor performance by the contractors and the delay and extension of time on some of the projects.

Administrative, goods and services

The underspending on this budget was due to allocation of R50m for updating and correcting of immovable asset register which was not spend. This amount will be spent in the next financial year as part of a R100 million project.

Compensation of Employees

.The under-expenditure on this budget is attributable to the delay in the filling of vacant positions.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

29. Budget differences (continued)

Machinery and Equipment

The under-expenditure is attributable to the delay in the procurement of the additional VC facilities Tenders which were advertised but could not be adjudicated before the end of the financial year. Also funding allocated for procurement of laptops throughout all the branches has not been spent due to delays experienced in ICT with the SITA contract.

Capital non-recoverable expenditure (Refurbishment

The reasons for underspending on this budget was due to the poor performance by the contractors and the delay and extension of time on some of the projects.

Capital recoverable expenditure (Client Capital)

The reasons for the underspending was due to the delay in the execution of projects which was caused by poor performance of some of the contractors, delays in appointing new contractors as well as the delays of the extension of time on some of the projects. As the projects are recoverable, the PMTE has to request approval from the client departments before tenders are advertised, when recommended bids are higher than the estimate and every time there is an increase in the cost of the project. Delays in client responses is a major cause of under-expenditure. Clients are expected to sign-off on their available allocations before the start of the financial year, but some Clients only make the allocations available during the first quarter of the financial year. This leads to further delays and under-expenditure as projects cannot be placed on the Procurement Plan before approval of the budget.

Notes to the Annual Financial Statements

30. Contingencies

| Contingent liabilities | 2020 R'000 | 2019 R'000 |
|---------------------------------------|---------------|---------------|
| Municipal services and property rates | 77 163 | 60 544 |
| Legal claims against the PMTE | 175 699 | 156 920 |
| | 252 862 | 217 464 |

Municipal services and property rates

The DPWI embarked on Phase II Invoice Verification project to verify claims made by local municipalities on arrear municipal debts. The project involved detailed investigation of claim with the local municipalities to ensure only valid claims are settled. For further details refer to note 16.

Legal Claims against the PMTE

The claims against the PMTE arose from property and maintenance disputes with various third parties and/or service providers as well as litigations regarding cancellations of rental leases. The entity's legal advisors are handling the claims on behalf of the PMTE and have assessed the probability of each claim in determining the total amount of the legal contingent liability and that the outflow of economic benefits is possible at the reporting date.

| Contingent assets | 2020 R'000 | 2019 R'000 |
|---------------------------------------|---------------|---------------|
| Municipal services and property rates | 828 | 828 |
| Legal claims by the PMTE | 240 526 | 239 067 |

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

30. Contingencies (continued)

Legal claims by the PMTE

The claims for the PMTE arose from property and maintenance disputes with various third parties and/or service providers. The entity's legal advisors are handling the claims on behalf of the PMTE and have assessed the probability of each claim in determining the total amount of the legal contingent asset and that the inflow of economic benefits is possible at the reporting date.

Special Investigating Unit recoveries

The Special Investigating Unit (SIU) was tasked to investigate certain leases between PMTE as the lessee and the Landlords with reference to Proclamation R38 of 2010 (which was extended with Proclamation R27 of 2015) as well as Proclamation R59 of 2014. In 2018, PMTE reported contingent assets of R765 million, however these cases did not translate into actual claims it is therefore deemed prudent not to further include these as contingent assets.

The SIU was tasked to investigate certain projects relating to prestige properties, with reference to Proclamation R54 of 2014 and Proclamation R59 of 2013. These matters are either currently preceding in court or summons have been issued for recovery of funds. Any possible recovery is not determinable at this stage.

Property, plant and equipment

There are 79 properties under the custodianship of National Department of Public Works and Infrastructure/ PMTE. The properties could not be reliably measured due to the extent either not being determined through the office of the Surveyor General or the extent being too excessive to apply the valuation method on. PMTE is in the process of validating these extent.

The PMTE is in the process of regularising the ownership of land parcels pertaining to state domestic facilities (SDF) built on land currently registered under a number of other state custodians. Whilst the SDFs have already been recognised, the PMTE estimates that there are 3 286 land parcels (2019: 3 183 land parcels) that will potentially need to be transferred to PMTE. Transfers can only be completed once an arrangement has been concluded with the current custodian and the land has been surveyed, registered or endorsed. The value of these land parcels can furthermore only be reliably determined once it has been surveyed and the revised Surveyor General diagrams have been issued. The PMTE received the deeds register on 30 April 2020 and is in the process of verifying the information. This could result in additional assets that may have to be recognised and/or assets to be transferred to relevant custodians.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

| | 2020 R'000 | 2019 R'000 |
|---|---------------|---------------|
| 31. Fruitless and wasteful expenditure | | _ |
| Reconciliation of fruitless and wasteful expenditure | | |
| Opening balance | 88 900 | 87 199 |
| Fruitless and wasteful expenditure - relating to current year | - | 3 254 |
| Fruitless and wasteful expenditure - relating to prior years | - | 1 221 |
| Less amounts resolved | - | (5) |
| Less amounts reversed | (652) | (2 769) |
| | 88 248 | 88 900 |

Amounts that are awaiting resolution are still in the process of assessment to determine if they are valid instances of fruitless and wasteful expenditure. All assessment and determination tests are conducted in terms of the Fruitless and Wasteful Expenditure Framework.

IAmounts resolved relate to instances where the determination test revealed that these transactions do not meet the definition of fruitless and wasteful expenditure. These transactions resolved by following the processes in accordance with the Fruitless and Wasteful Expenditure Framework.

SIU investigations in terms of proclamations R38. of 2010, R.59 of 2014 and R.27 of 2015 are on-going. Recommendations stipulated in the investigation reports received by Management are implemented after following the necessary internal control processes and disclosed accordingly.

32. Irregular expenditure

| | 1 627 414 | 1 741 884 |
|--|-----------|-----------|
| Less: Amounts not recoverable (not condoned) | (114 052) | (510 883) |

| Opening balance | 1 741 884 | 2 334 039 |
| | R'000 | R'000 |
| | 2020 | 2019 |

IDetermination tests are on-going on all instances of irregular expenditure in accordance with the Irregular Expenditure Framework. Where determination tests have been concluded and officials are found liable in law, appropriate actions are taken by management in line with the relevant prescripts.

Current year amounts condoned relates to an amount where the transaction was confirmed to meet the definition of irregular expenditure. However, the determination test conducted in terms of the Irregular Expenditure Framework revealed that no official was found to be liable for the irregularity nor was any losses suffered by the State. The transaction was then condoned by the relevant authority.

Prior year amounts condoned relates to transactions where consultants in construction were appointed in terms of the Roster Consultant System and condoned in prior years.

Amounts not recoverable (not condoned) relates to transactions dealt with in terms of the National Treasury Irregular Expenditure Framework and approved by the National Treasury in prior years. Included in this amount are instances where transactions did not meet the definition of irregular expenditure.

SIU investigations in terms of proclamations R38. of 2010, R.59 of 2014 and R.27 of 2015 are on-going. Recommendations stipulated in the investigation reports received by Management are implemented after following the necessary internal control processes and disclosed accordingly.

34. Risk management

Financial risk management

The entity's activities are exposed to a variety of financial risks which includes market risk (including interest rate risk), credit risk and liquidity risk.

The Director-General, as the Accounting Officer, is responsible for strategic risk management. The Audit Committee provides oversight over the risk management. The PMTE has a risk management strategy that has been developed in terms of the Treasury Regulation 3.2. The purpose of the PMTE risk management strategy is to identify the risks and ensure that the overall risk profile remains at acceptable levels. The risk management strategy provides reasonable, but not absolute, assurance that risks are being adequately managed.

The PMTE risk policy sets out the minimum standards of risk management to be adopted and adhered to by all the units within the PMTE. The risk policy is established to identify and analyse the risks faced by the PMTE, to set appropriate risk tolerance levels and controls and to monitor risks and adherence these tolerance levels. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the PMTE activities. The risk management policy contains processes for identifying both the impact and likelihood of such a risk occurring. Risks that have been identified as having a potentially severe impact on the PMTE are regarded as unacceptable and where possible will be avoided. Financial risk is not considered significant with the exception of the overdraft.

Responsibility for adherence to the PMTE risk management strategy rests with the management. Internal Audit provides reviews of management's compliance to the risk management processes within the PMTE. Internal Audit reports to management and the Audit Committee on a regular basis.

34. Risk management (continued)

Liquidity risk

2020

Liquidity risk is the risk that the PMTE is not able to settle its obligations. The entity manages liquidity risk through an ongoing review of future commitments and credit facilities.

For operating lease liabilities and finance lease liabilities, the maturity analysis is disclosed in note 5 and note 14 respectively. Operating lease payments for vehicles increases annually based on CPIX. All payments are due within 30 days except tender deposits and retentions which are due when the related contracts expire. These tender deposits are considered immaterial in managing the cash flows of the PMTE and have been excluded from the maturity analysis below

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

34. Risk management (continued)

For further commitment disclosure for operating leases, refer to note 5.

The PMTE's policy is not to enter into capital and/or lease commitments without ensuring commitment from the client departments to settle its obligations.

The liquidity maturity analysis represents the contractual cash flows and has not been discounted.

Credit risk

Credit risk is the risk of financial loss to the PMTE if a client department or counterparty defaults on its contractual obligations to the PMTE. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the Statement of Financial Position.

The PMTE may have financial assets arising out of transactions with suppliers due to overpayments and non-delivery.

The PMTE manages this risk by requiring retentions and or guarantees before contract work commences.

The credit risk of financial assets arising out of lease contracts as it relates to transactions with other government departments and institutions is actively managed where there are disagreements about inter-governmental debt.

The PMTE first engages with the respective client to resolve the issue and if required involves National Treasury to mediate the situation. These various government institutions have no independent credit ratings.

Outstanding debt is assessed for impairment and amounts are not written off unless the authorised process is followed. However, as a result of client departments' inability to accumulate savings to settle debt, a considerable amount of time may expire before the amount is collected.

The PMTE is also exposed to additional credit risk as a result of the transfer of functions as it now also collects monies from the private sector for leases. The extent of these are not considered to be material.

The PMTE makes provision for this in the impairment calculation by discounting the expected future cash flows taking into account the expected period of payment.

The PMTE does not enter into additional leases with any client departments without first assessing the current outstanding debt of the client department.

Amounts that are neither past due nor impaired are considered to be recoverable as it relates to the current invoices not outstanding later than 30 days.

The nature of the PMTE's exposure to credit risk and its objectives, policies and processes for managing credit risk have not changed significantly from the prior period.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

34. Risk management (continued)

Financial and statutory assets exposed to credit risk at year end were as follows:

| | 2020 R'000 | 2019 R'000 |
|--|---------------|---------------|
| Cash and cash equivalents | 8 114 | 6 647 |
| Operating lease asset | 645 619 | 389 581 |
| Receivables from exchange transactions | 3 884 299 | 3 944 888 |
| Receivables from non-exchange transactions | 109 | 252 |
| | 4 538 141 | 4 341 368 |

The carrying values of the above financial assets are net of any impairments and approximate their fair value.

None of the amounts disclosed above have been pledged as security or collateral for liabilities or contingent liabilities.

Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The PMTE is exposed to limited interest rate risk from cash balances as it sweeps transactions through commercial accounts to the Reserve Bank account.

The PMTE is exposed to changes in the interest rate applicable to debt owed to the state. Other changes in interest rates are considered insignificant. National Treasury determines this rate and manages the risk on behalf of National Government.

35. Related parties

The PMTE performs property management services for the state owned and leasehold immoveable assets occupied by National Departments and their related parties, and recognises and recovers accommodation charges from them.

The PMTE is exempt from disclosure of related party transactions provided that the services are received/delivered within normal supplier/client relationships, on terms and conditions that is no more nor less favourable than those that would have reasonably be expected to be adopted if dealing with that entity/person in the same circumstances. The extent of those transactions delivered in accordance with the PMTE legal mandate and that meets the exemption criteria, is included in note 17 (accommodation charges - leasehold inter-governmental and management fees on municipal services).

The PMTE operates within the administration of the DPWI and as such all contracts are entered into in the name of the DPWI. The liabilities and obligations arising from these transactions are accounted for by the PMTE if it relates to the PMTE operating activities as these liabilities will be settled using the PMTE funds and resources. As such, these transactions are not considered related party transactions.

Annual Financial Statements for the year ended 31 March 2020

Notes to the Annual Financial Statements

35. Related parties (continued)

Other overhead costs include the sharing of corporate services between the DPW and the PMTE. Due to the nature of these transactions and the operational structures between the PMTE and the DPW, the value of these shared costs cannot be reliably measured. These costs, paid by the DPW on behalf of the PMTE and not recovered, include the following corporate shared services:

- Supply Chain Management (SCM) for head office
- Internal Audit
- Human Resources (Human Resource Management and Human Resource and Organisational Development)
- Gender, people with disabilities, youth and children
- Marketing and Communication
- Information Services
- Legal Services
- Security Management
- International relations and Strategic Management Unit
- Office of the Ministry, Office of the Director General and Office of the Chief Financial Officer
- Monitoring and Evaluation
- Labour Relations

In addition, the DPW and the PMTE share the service cost of certain special interventions entered into in support of the turn around strategy. These cannot be reliably separated. The PMTE receives an augmentation of funds from National Treasury via the DPW to fund its operations.

The PMTE recognises accommodation revenue on state owned buildings based on the amount budgeted by client departments. The level of service delivery relating to this accommodation charge is not linked to the value received, it is likely that some clients may benefit to the disadvantage of others. It is not possible to identify the extent of benefit or disadvantage received. The full amount of the revenue transaction is disclosed in note 17. The related receivables (accommodation debtors - freehold inter-governmental) is disclosed in note 3.

Revenue from exchange transactions:

| Accommodation charges - freehold intergovernmental | | |

The PMTE incurs costs relating to cleaning and gardening services for leasehold properties occupied by certain client departments. Figures reflected in the tables below reflect the related party transactions applicable per client department. These costs are not recovered from client departments, and therefore considered a free service to them. The related party accruals disclosed below are unsecured and are expected to be settled within the normal course of business.

- Mr M Sithole was appointed as Acting Head of Finance (PMTE) at the beginning of May 2018.
- -Mr R Naidoo was appointed as Acting Head of SCM since 1 May 2018.
- Ms N Makhubele moved from DDG: REMS to Act DDG Facilities Management on 1 June 2018.
- Mr PF Chiapasco moved from Act DDG: Facilities Management to Act DDG PMO on 1 June 2018.

The position of the CFO is on the structure of DPWI Main Vote:

- Ms R Sadiki resigned as Chief Financial Officer at the end of April 2018.

36. Events after the reporting date

Implications of COVID-19 on the Annual Financial Statements

In terms of the regulations and as confirmed by the Minister in the media release release on 29 May 2020, the Department of Public Works and Infrastructure's (DPWI) role is to identify and make quarantine sites available to the Department of Health.

The cost cannot be quantified at this stage, as the number of sites to be provided will vary based on escalating infections in the country.

37. Prior period errors

Material differences relating to prior years and the prior year financial statements will only be restated at year end.

| Decrease in receivables from exchange transactions Decrease in property, pland and equipment Increase in Heritage assets Increase in Investment property Increase in payables from exchange transaction Increase in deferred revenue | Restated 2019 R'000 (281 824) (8 323 375) 2 894 609 1 098 919 (25 670) (80 546) |
|---|---|
| Decrease in net assets | (4 717 887) |
| Statement of Financial Performance Increase in revenue from exchange transactions Increase in revenue from non-exchange transactions Decrease in Property rates Increase in loss on transfer/disposal Decrease in depreciation, amortisation and impairment Increase in sundry operating expenses Decrease in impairment loss on receivables Increase in profit | 1 285 4 849 57 451 (52 239) 248 534 (519) 15 406 |
| Decrease in opening accumulated surplus | (4 992 654) (4 717 887) |

Management identified errors in the asset registers and its calculations. Management reassessed the GRAP classification of projects to ensure that all projects were linked to the correct buildings and appropriately classified per classes. Extents and the components of the properties were verified and corrected. Management revisited the methods of determining the deemed costs for assets which were transferred effective 1 April 2013. Additional information arose which resulted in additions to assets under construction. The correction of the assets also affected the depreciation, impairment, amortisation, deferred revenue, revenue from accommodation charges and donation revenue.

Management assessed the applicability of iGRAP 19 and deteremined that its previous disclosure in respect of liabilities to pay levies was incorrect. Management corrected the prior period disclosure to account for this incorrect interpretation. The restatement affects the Prepaid Expenditure account, the property rate expenditure and the property rates accruals disclosure.

Annual Financial Statements for the year ended 31 March 2020

38. Going concern

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

Although the PMTE has a bank overdraft of R2,6 billion (March 2019: R2,7 billion) and the current liabilities exceed the current assets by R8.8 billion (March 2019: R11,2 billion), management maintains their assertion that the PMTE is able to continue on a going concern basis into the foreseeable future. Current liabilities includes Deferred Revenue as disclosed in note 11 of R5.7 billion (March 2019: R7,9 billion) and other non-financial instruments of R950 million (March 2019: R877 million) (note 12) that will be settled in services rather than cash. Management applies the accounting principles of conservatism and prudence when accounting for its liabilities. The PMTE operates under the control and support of the National Department of Public Works and Ilnfrastructure ("DPWI"). National Treasury has been informed of the PMTE's position accordingly. Management is embarking on a revenue generating drive and has reinforced its efforts in collection of all outstanding debts. The main reason for the increase in the bank overdraft was due to the increase in the amounts owed by client departments. Management has engaged in robust discussions with the relevant departments and National Treasury to resolve the issues around non-payment and to ensure payment is received on outstanding amounts. Subsequent to reporting date R1.2 billion was received relating to these outstanding debts. Refer to note 35 for more detail relating to outstanding debt owed by client departments.
